

MV-100

Better comfort for examinations and minor procedures

The innovative minor LED surgical light MV-100™ is the ideal light for examinations and minor surgical procedures at clinics, hospitals and physicians practices.

User benefits in a nut shell

Low-glare illumination with neutral white light

Optimal depth of illumination - no refocusing necessary

Large illuminated area for most demanding procedures

High colour rendition for natural and accurate reproduction of examination areas

Enhanced visualisation of red tissues

Long durability of LED's – more than 20 years at standard use

Removable sterilisable grip

Sterile disposable handle available

Brightness control on the control panel of the light head as well as via grip

LED brightness indicator bar on light head and grip

Available in three configurations – Mobile, Wall Mounting and Ceiling Mounting

Product codes:

4530.0000.06 MV-100 Minor surgical light, Ceiling Mounted

4520.0000.06 MV-100 Minor surgical light, Wall Mounted

4510.0000.06 MV-100 Minor surgical light, Mobile, EURO model

Clase de protección (IP)	42
Tensión principal	100 - 240 V
Tensión secundaria	24 V
Consumo máx. de energía	60 W
Intensidad de la iluminación Ec a 1 m de distancia	100000 lx
Profundidad de iluminación @ 60 %	960 mm
Temperatura de color	4500 K
Diámetro del campo luminoso, d10 valor	190 mm
Diámetro del campo luminoso, d50 valor	107 mm
Índice de rendimiento del color (Ra)	95
Índice de rendimiento del rojo (R9)	<94
Número de Leds	30
Duración media de los LED	> 50 000 h
Peso de la Lámpara	2,9 kg
Consumo (W)	33
Product Code	4530.0000.06, 4520.0000.06, 4510.0000.06
